

WCRE  
World Council for Renewable Energy

### Climate for Peace – A new WCRE/EUROSOLAR campaign

All of the present conflicts in the world, whether they are for land, beliefs or historical perspectives, seem petty when compared to the greater threat of global climate change and unsustainable conventional energy supplies. The challenge to meet this greater threat to human existence can unite all people in peace rather than waste resources and time in the conflicts.

WCRE/EUROSOLAR launched 'Climate for Peace' in 2009 during the last great conflict in the Middle East – <http://www.climateforpeace.org>. Now the signs are more hopeful again, after months of unbridled violence, irretrievably lost innocent lives, and wasted human energy on all sides. As a result, a desperately needed reconstruction wave is being prepared for Gaza. Since the WCRE and EUROSOLAR stand for a 100% renewable world, it makes sense for these organizations to call for purposeful and renewable forms of reconstruction, to nurture sustainable prosperity and resilience in the cooperation and coexistence of both Palestinians and Israelis.

This is a two part call:

1 We call on all funding governments, international agencies and NGOs to abide on a 'renewable reconstruction' policy, to provide resilient, sustainable and enduring infrastructures to those most in need, and to connect all capital investment to the rapid rollout of peaceful renewable energy based infrastructure and development frameworks.

2 We now look for enthusiastic supporters – while we gauge high level contacts in European aid agencies and governmental organizations, along with the Palestinian Authority and Israeli counterparts. We are committed to supporting a just, value creating and renewable Solar Renaissance of the region. Kindly indicate if you are interested to help.

In this way we hope to also set signals for the Ukraine-Russia conflict and other powder kegs of the world – many of which are shadows and creatures of a fading fossil-nuclear age .... these are massive distractions while we struggle to avert a climate switch that could render Earth inhabitable in a relatively short time.

We propose to raise a modest fund enabling EUROSOLAR and WCRE seeking expression of interests to actively work on this to gather the intelligence and launch the policy and program calls necessary to rebuild a renewable Gaza in a wider and sustainably managed multi-cultural region. Would you like to join us to create a renewable „Climate for Renewable Peace"? Then contact us at [info@climateforpeace.org](mailto:info@climateforpeace.org)

Supported by WCRE and EUROSOLAR representatives:

Professor Hussain Al-Towaie  
WCRE Chairpersons' Committee  
Owner & CEO of CE&SD  
Energy, Water, Environment, invention and patent issues

Professor Peter Droege  
President EUROSOLAR  
General Chairman WCRE  
Chair Sustainable Spatial Development University of Liechtenstein

Professor Nasir El Bassam  
WCRE Chairpersons' Committee  
Director International Research Center for Renewable Energy (IFEED)  
Jose Etcheverry Ph. D.  
WCRE Chairpersons' Committee  
Associate Professor, Faculty of Environmental Studies, York University

Hans-Josef Fell  
WCRE Chairpersons' Committee  
Member of the German Parliament (1998-2013)  
President Energy Watch Group

Professor D. Yogi Goswami  
WCRE Chairpersons' Committee  
Distinguished University Professor University of South Florida

Stanley Igwebuike Ijeoma  
WCRE Committee of Chairpersons, Country Representative for Nigeria

Jeremy Leggett Ph. D.  
WCRE Chairpersons' Committee  
Founder and Chairman Solarcentury & SolarAid

Josep Puig Ph.D.  
Chair Board of Trustees EUROSOLAR  
President EUROSOLAR Spanish Section
